6 FAQs and Troubleshooting

Dashboard Overview

Read metrics, understand stats, and navigate admin workspaces.

The admin dashboard gives you a real-time view of platform activity including active RFQs, supplier registrations, verification queue size, and procurement spend.

Key metrics explained

- Active RFQs: Total open requests for quotation on the platform
- Quotes Received: Supplier responses to active RFQs
- Active Contracts: Contracts currently in progress
- YTD Spend: Total procurement spend year to date

Supplier Verification

Review applications, approve or reject suppliers, and manage queues.

Steps

- 1 Go to Dashboard then Verifications
- 2 Click Review supplier on any pending application
- 3 Check business details, uploaded documents, and CSD number
- 4 Click Approve to verify the supplier or Reject with a reason
- 5 Supplier receives an email notification of the decision

Frequently Asked Questions

How do I re-open a rejected application?

Find the supplier in the user list and change their verification status back to Pending in the database via Supabase SQL Editor.

What documents should I check before approving?

Tax clearance certificate, BBBEE certificate, CSD registration, and banking confirmation letter.

User Management

Manage accounts, roles, and delete users.

Key actions

- View all users: Dashboard then Admin then Users
- Change user role: Edit profile in Supabase profiles table
- Delete account: Use the Delete account function — data is soft-deleted for 30 days then permanently removed

Analytics and Reports

Use Spend Analysis, Compliance Report, and BBBEE Scorecard.

Spend Analysis

- YTD spend totals
- Spend by category and province
- Top suppliers by spend
- Spend over time chart

Compliance Report

- Verification status breakdown
- BBBEE distribution
- Document completion rates
- Non-compliant supplier list

BBBEE Scorecard

- BBBEE spend split
- Spend by BBBEE level
- Supplier directory by level
- Compliance trend over time

Platform Settings

Manage system settings and email templates.

Key settings

- Email templates: Customise verification approval and rejection emails
- SMTP configuration: Manage email sender settings
- User roles: Assign admin, supplier, or buyer roles

FAQs and Troubleshooting

Admin-specific issues and escalation paths.

A supplier says they did not receive their verification email — what do I do?

Check the Supabase Auth logs for email delivery status. Verify the SMTP settings are correctly configured. Manually resend from Supabase Auth then Users if needed.

How do I reset a user's password?

Go to Supabase Auth then Users, find the user, and click Send password reset email.

A user's SmartScore is not updating — what do I check?

Confirm the profile was saved after changes. Check the profiles table in Supabase to confirm the score column was written. If not, trigger a manual recalculation by updating any profile field and saving.
